

BACKEND DAY 2

Nodejs is not a library, framework, language it's just a Javascript Runtime Environment

In easy words JAVAScript cant write backend so we do use Nodejs which is a wrapper on C++ of google v8 engine

المفاتيح
Wiring Devices

الإنارة
LED Lighting Fixtures

المواسير
Conduit Pipes

القواطع الكهربائية
Switchgear

ألواح الطاقة الشمسية
Solar Panels

fs (File system) it installs with node js we don't need to install it externally using npm

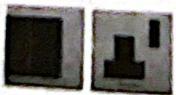

learned About

fs. writefile() — To make new file

fs. appendfile() — To add more content in previous file

fs. rename() — To rename

fs. copyFile() — To make a copy

المفاتيح

LED Lighting Fixtures

المصاعد

أجهزة الأمان المنزلي

`fs.unlink()` — To delete file

`fs.rmdir()` — To delete directory / folder

FTP AND HTTPS

Without http protocol you can't send or receive request on internet, plays an important role

you can make a server using http

`http.createServer()`
